Wiejelo Equipment

Wiejelo Equipment is highly specialized in the engineering, design, development and worldwide distribution of automatic lubrication systems and automatic fire suppression systems.

We supply automatic fire suppression and lubrication systems to OEM, distributors and end-users worldwide in different market segments.

Thanks to a dedicated and experienced engineering team, Wiejelo is able to fulfil any demand and requirement from the market.

Wiejelo Equipment is a dynamic organization with its headoffice in The Netherlands and branches in the USA, Asia and Scandinavia.

Besides sales, supply and distribution, Wiejelo provides extensive training to instruct our customers about installation and maintenance of our systems to ensure a high level of quality.

We supply our systems for the following industries:

- Agricultural
- Offshore
- Earthmoving and Construction
- Recycling
- Steel industry and Paper industry
- Buses and Coaches
- Trucks, Trailers and other Transportation
- Port equipment
- Mining
- Wind energy
- Aviation (Ground Handling Equipment)

ILC Automatic Lubrication Systems

Wiejelo Equipment is a system integrator of ILC lubrication systems in different parts of the world. ILC is a leading manufacturer in Europe with an extensive product range.

System types include:

- One-line systems
- Dual-line systems
- Progressive systems
- Oil (air) lubrication systems
- Minimal quantity lubrication systems

ILC distinguishes itself in price / quality ratio and is one of the few manufacturers which extensively tests each pump and component before leaving the factory. We offer a wide range of products: from a single grease nipple to complete systems. Whether a lubrication system for a semi-trailer, construction equipment or a complete stationary installation, our extensive knowledge and wide range of products ensures we are always able to offer the right solution.

When a standard option does not fully meet your requirements we are able to design and develop a custom made solution.

Benefits of a progressive ILC (automatic) lubrication system

- Systems accomodate 0- to 2- grease systems
- Standard low-level notification
- Self-venting
- Stirring paddle in reservoir to prevent grease from separation
- Fail-save system
- Professional installation by experienced service technicians
- Global service network

Increased safety

An automatic lubrication system prevents maintenance personnel from getting involved in dangerous and hazardous situations. Many safety risks can be avoided by using an automatic lubrication system.

Wiejelo Equipment, the specialist in lubrication applications

Installation and Service

Wiejelo Equipment provides installation and maintenance of your systems on location, at the end customer, or at your own facility.
We are flexible and can provide maintenance and parts for any lubrication system, with a wide range of parts in stock.

Wiejelo Equipment ensures:

- The best service
- The best quality
- Custom training including full documentation for installation
- Complete installation by Wiejelo Equipment
- The best value for money

Service

All our systems have certifications recognized worldwide. The quality of Wiejelo Equipment products meet the highest possible standards. However, to ensure a long service life for our products, equipment requires timely service and maintenance. Our Service Department is able to assist you with all of your service and maintenance needs.

Quality and Structure

We at Wiejelo Equipment know from experience that the quality and the installation of an lubrication systems is essential. Commissioning of systems provided by Wiejelo is only performed by experienced and specially trained technicians with extensive experience in this field.

Our experienced technicians are specialized in installing these systems in the most difficult locations and situations. We at Wiejelo Equipment can also work together with most OEM manufacturers / suppliers so that lubrication systems can be installed in the factory.

Installation and Service

We design and install automatic lubrication systems for:

- Excavators
- Wheel loaders
- Bulldozers
- Dump trucks
- Tractors
- Telescopic handlers
- Reach stackers
- Tower cranes
- STS cranes
- Stationary installations
